

Koyokizai Co., Ltd. / Sigtec Fasteners Inc.

► Company profile

The objectives of our business include research and development, manufacture and sale of industrial fasteners, as well as acquisition and management of industrial property rights. Our main products are gypsum board anchors, heavy-duty hollow wall anchors, blind anchors for steel structures, threaded bolt anchoring systems, inserts for deck plates and a variety of special nuts. We have also made considerable achievements in joint development projects with construction material manufacturers, and are supplying OEM products. If you have any requests or questions concerning fasteners, please feel free to contact us.

► Our main products

Blind fasteners

Gypsum Board Self-drilling Anchor
(USA Pat. No. 6139236, EU Pat. No. 1055074)

Hollow Wall Versatile Anchor – No matter how thick the workpiece, it's workable. Choose any style of bolt. (PATPEND)

Blind Anchor for Steel Structures – For heavy-duty use, it requires a very small pre-hole. (PATPEND)

Special nut series

SIGTEC Security Nut – Tamperproof, but removable with use of a special tool.

Clamp Nut – Can be positioned anywhere on the threaded rod in no time! Cost and time saving. Size M6 · W1/4 up to M16 · W5/8 available. (PATPEND)

One-way Self-Locking Nut – Place a One-way Self-Locking Nut over a conventional nut for an easy and reliable locking solution.

Self-drilling inserts for deck plates

Drill insert / Drill hanger – Hanging 3/8" threaded rod. For ceiling, plumbing, electrical, sprinkler and HVAC work. (USA Pat. No. 5649798)
